Multi-channel, electronic circuit breaker with active current limitation for protecting four loads at 24 V DC in the event of overload and short circuit. With nominal current assistant and electronic locking of the set nominal currents. For installation on DIN rails.

Your advantages

- · Easy to configure, thanks to the nominal current assistant
- · Active current limitation to improve the capacity of the upstream power supply
- Adjustable in increments per channel:

from 0.5 A to 10 A

- Easy system monitoring with early signaling and direct pickup of information at the product
- Increased system availability with intelligent detection of under- and overvoltage
